

OFFICE 365 PROPLUS NOW AVAILABLE TO ALL STUDENTS

Office 365 ProPlus enables each student to use their Department email address to download and install Microsoft Office software. This includes full versions of Word, PowerPoint, Excel, Access, OneNote, Outlook and Publisher on up to 10 devices (five PC/Mac computers and five tablet/smartphone devices).

This free offering may be of considerable benefit to families and individuals who would otherwise need to purchase licences or subscriptions for the Microsoft Office software suite. The following text may be useful if you wish to inform parents of ProPlus availability.

The Department of Education has made available to all students the opportunity to access licensed versions of the full Microsoft Office software suite. This software can be downloaded at home or via other private networks and installed on up to 10 devices (five PC/Mac and five tablet/smartphone installs). Visit the Office 365 link at the top left of the student email screen to start the installation. Further information and installation instructions are at [Install Office on your PC or Mac with Office 365 for business](#).

Students will need to use a non-Department internet service as this software download is blocked on our network to preserve bandwidth and protect essential services.

Further information about Office 365 ProPlus is on the [Microsoft website](#).
